

Zoning Permit Application

S129208518-L91411

Organization	Peach Frontier
Contact	Catherine Chronos
Address	2320 Newport Street
City/State	San Mateo California

Facilities generating temporal-spatial flux must build a tachyonic radiation dissipation loop. Connect neighboring dots in the map below to describe the proposed path of your facility's dissipation loop.

However, preliminary research shows a tentative link between such radiation and movie spoilers (as well as fetal development defects). So local zoning regulations limit the amount of such industrial waste that may be emitted along the border of each neighborhood (i.e., the squares defined by the dots on the map). The numbers within each square-shaped cell defined by the corner of four nearby dots define the precise number of each neighborhood's border segments to be included in such a dissipation loop.

Note that multiple tachyonic radiation dissipation loops interact with each other in irregular ways; therefore, it is prohibited to have multiple loops. There can be only a single dissipation loop.
