

Help!

What with all the chronomentometers breaking and everything else that's going on, we totally forgot to arrange for any dinner at Peach Frontier Labs! And who knows what places are open now?

Now the lab assistants back here at the lab are revolting (no crude jokes please, it's already stressful enough) and they won't do any work until they are fed. (That's why I had to hand-write this note.) So, here's a page from the recent edition of the Weekly Coupon Flyer. Here are the parameters:

- * We only have a budget of precisely \$100. Not a penny more.
- * 20 Lab assistants need to be fed. Fully. No silly business like buying 9 meals and splitting it 10 ways.
- * 5 of the 20 Lab assistants are vegetarian (not vegan, thankfully) and won't eat anything that's touched meat. So, no ordering chicken fried rice and picking out the chicken.
- * Lab policy is that we always tip exactly \$3 to every place that we get food from. No more, no less. No exceptions.
- * We know that some of you are probably rich folks who would rather solve our problem by just buying food for everybody, but we cannot accept any of your generosity. At least, not anything related to money or food.
- * One of the lab assistants last week tried to put one over on one of the restaurants by trying to pass off a coupon that was only partially complete. We never heard from him again. So don't do that.
- * The off-site lab assistants are fine. It's just the 20 here at the main lab that you need to worry about. Don't worry about me or Mrs. When either.

Please figure out what I should order! When you have, go ahead and cut out the coupons, then tell the lab assistants there at the gym precisely what I should order from each restaurant, how much I should pay each restaurant, how much to tip, and how you arrived at those numbers. They'll then check it and pass that information along. Don't screw this up; you've got the only sheet of coupons I could find. Hurry, since we still need to fix the time machine and save Professor Chronos!
